

The graph shows a function that starts at a high value, decreases to a minimum, and then increases to a constant high value. This represents a process that starts with a high level of a certain factor, decreases to a minimum, and then increases to a constant high level.

A graph showing the function $y = 10x$. The line passes through the origin (0,0) and has a steep positive slope. The number 10 is written near the line.

A graph showing the function $y = 10x$. The line passes through the origin (0,0) and has a steep positive slope. The number 10 is written near the line.
